

### **CHECKLIST FOR MONITORING SEDATION:**

- Set up for IVC (never a bad idea to have venous access..even if not required)
- Set up for specific procedure
- Monitoring equipment ready
- Anesthesia machine ready w/ circuits for blow by O2 and leak tested
- General idea of ET tube size if needed to intubate + having equipment nearby I.C.E.
- Fluids/pump if providing fluid therapy- ask if DVM has preference
- Heat support
- Smartflow tablet (for TX sheet/monitoring as this is part of our medical record)
- Drugs (double, triple check drug and concentration, dose, and volume)
- Basic monitoring parameters acceptable for that patient
- 2nd person available to help prep (never be afraid to ask for a little help :))
- DVMs time frame (being aware of the onset and duration of action when administering)
- Rounding to DVM that are starting (keep it brief, detailed, and pertinent)

If you don't know something, ask. If you need help, ask.

Remember...safety first :)
