

Step by step how to run a room

Find the client/ patient you are looking to room, walk them to room, introduce yourself to client, let them know you are going to get some vitals on their pet and you have a few questions for them and then the doctor will be in

Vitals:

Weight:

T:

P: (ascult and palpate pulse)

RR:

MM:

CRT:

Attitude:

Must ask the following questions each time:

Presenting concern: (duration of issue if present)

Current/ prior medical issues/ diagnosis/ allergies:

Current/ prior medications/ supplements/ preventatives (mg and frequency):

Eating and drinking normally- any increase? (if not note abnormality and duration)

Urinating/ defecation normal- any increase? (if not note abnormality and duration)

Coughing/ sneezing/ vomiting/ diarrhea?

UTD on VX? Which ones are they due for? Would O like to update them today if possible?

Prior travel/ plans to travel with Pt?

Anything else O would like to mention/ questions they may have for the doctor:

Enter this information into medical record

When rounding to doctor present signalment:

Age, sex, breed, presenting complaint and brief history from above

Either go in room with doctor if they prefer to have a holder or start estimate for what you think may be needed for that case, draw up VX etc. ANTICIPATE doctor needs
